

HOW HEALTHY ARE OUR STREAMS? VOLUNTEER AS A STREAM MONITOR AND HELP US FIND OUT

Learn to collect and identify stream insects that are good indicators of water quality and stream health at an indoor workshop. Then we will apply our training in the field at selected sites in the Salmon River Watershed. CT DEEP will use the results to assess the health our local streams.

Saturday, September 10, 2016
9:30am-2:30pm

East Hampton Public Library—105 Main Street

- * Please pre-register by contacting Patricia Young ~ (860)345-8700 ~ salmonriverct@att.net
- * Dress appropriately for fieldwork. Old sneakers, boots or hip waders are recommended. Bring a lunch or snacks.
